POLICY NAME:	Technological Studies Safety	LAST REVISED:
POLICY NUMBER:	P.SMW.G.8	April 8, 2002

Technological education programs encompass broad-based technology and computer studies and emphasize an activity-based approach to learning. These programs offer excellent opportunity for students yet, because they mimic the workplace, risks for injuries can be high and precautions must be developed at all times to protect staff and students.

Safety is an important element of technological education programs. It is the responsibility of staff and students to promote a safe environment as outlined in the Education Act and Regulations and the Occupational Health and Safety Act and Regulations.
